## EXPLANATORY NOTE.

---

This summary of crop statistics for the United States has been in frequent use, in manuscript form, for several years; and it is now published in order that field agents, crop reporters, and others may have it for ready reference.

The arrangement of items and the grouping of years in the 5-year averages were made to meet the special needs of war-time work in this department, and are still found useful in making comparisons.

The publication of this summary is to some degree experimental. Criticisms and suggestions are invited. When the results of the Fourteenth Census are determined, a new crop summary for the use of this bureau will be needed, and suggestions based upon the present handbook will be a guide in the preparation of the new edition.

## INDEX.
